Our Premium Equine Dental Service

Comprehensive Oral Examination and Treatment Plan

Keep your horse comfortable, performing and eating well with a full-mouth exam and professional float.

HVS

EXPERT VETERINARY CARE. ON THE MOVE.

Why dental care matters

Horses' teeth erupt and wear continuously. Sharp enamel points, hooks, ramps and wave mouth can cause pain, bit resistance, quidding, weight loss and poor performance.

Subclinical dental disease is common—even in horses that seem to eat well. Regular, evidence-based dentistry helps prevent ulcers, food packing from cheek teeth, and detect periodontal pockets or fractured teeth early.

Included in Annual Packages:
- **Base**
- **Old Timers & Retirees**
- **Elevation**
- **Summit**
- **Performance.**

What we do:

- Comprehensive manual and oroscopic oral examination with detailed charting, photos/video for your records.
- Sedation for welfare and precision, soft tissue exam, periodontal probing, occlusion assessment.
- Motorised float to correct points, balance arcades and optimise occlusion while preserving function (conservative reduction only).
- Bite/bit assessment and management advice (wolf teeth, bit rubs, tongue/commissure lesions).
- Take-home handouts with findings, recommendations and recall interval.

Faecal Egg Count (FEC) with Annual Worming Plan

Smarter parasite control saves money and protects wormer effectiveness.

Why FEC matters

Parasite burdens and shedding vary horse-to-horse. Blanket or rotational deworming promotes anthelmintic resistance and may be unnecessary for low shedders. A Faecal Egg Count (EPG) identifies individual shedders, guides selective treatments, and verifies if wormers are still working on your property.

What we do

- Collect and submit a fresh sample for quantitative FEC (strongyle and ascarid EPG).
- Interpret results by shedding category and season for South-East QLD conditions.
- Provide a property-specific annual worming plan, including:
  - Who to treat and when
  - Strategic times (spring/autumn; foals/youngstock protocols)
  - Manure management and cross-grazing tips
  - Resistance check: optional FEC Reduction Test 10–14 days after treatment to confirm efficacy.

Included in Annual Packages:

- **Base**
- **Old Timers & Retirees**
- **Elevation**
- **Summit**
- **Performance.**

Vaccination and Health Check

Vaccination is the simplest, highest-value protection we offer.

Our approach

- Review previous records and design a tailored schedule (priming + boosters) for your horse's age, pregnancy status and workload.
- Align boosters with dentistry or package visits to minimise call-outs.
- Provide digital vaccination certificates for your records and event entry requirements.

HVS

EXPERT VETERINARY CARE. ON THE MOVE.

Included in Annual Packages:
• Base
• Old Timers & Retirees
• Elevation
• Summit
• Performance.

Core vaccines we deliver

- **Tetanus** – life-threatening neurotoxin exposure from wounds or surgery.
- **Strangles (Streptococcus equi**) – reduces severity and spread of this highly contagious upper-airway disease.

Risk-based vaccines available

- **Hendra virus (HeV)** – endemic risk in Queensland; vaccination is the most effective prevention. Many venues and vets require current HeV vaccination for elective/emergency procedures.
- **Equine Herpesvirus (EHV-1/4)** – respiratory disease control (performance yards) and pregnancy protection (EHV-1 abortion protocols for pregnant mares).

Farrier Radiographs (All Four Feet) + In-Depth Farrier Report

Measure what matters—prevent small imbalances from becoming lameness.

Why foot radiographs?

Hoof balance is biomechanics. Radiographs quantify hoof-pastern axis, palmar angle, sole depth, toe length, breakover, heel height and distal phalanx (P3) rotation. Imaging guides trimming/shoeing, documents laminitis changes, and helps farriers and vets make the same plan.

What we do

- Mobile, low-dose digital radiography with protective protocols.
- Standard views for each foot: Latero-medial, Dorso-palmar/plantar, High-beam 60° DP; additional views (e.g., navicular skyline) when indicated.
- Measurement set and overlays in your written report: HPA, palmar angle, sole depth, dorsal wall thickness, breakover, and heel/toe ratios.
- Collaborative plan with your farrier (we share the images and numeric targets; phone consult available).

Included in Annual Packages:

- **Base**
- **Old Timers & Retirees**
- **Elevation**
- **Summit**
- **Performance.**

Prevention is better than cure!

Start screening for conditions and supporting joints before it's too late.

Subtle changes in blood markers and movement often appear months before visible signs. Proactive screening and early joint support help protect performance, comfort and longevity while reducing time off work.

HVS

EXPERT VETERINARY CARE. ON THE MOVE.

Included in Annual Packages:
• Old Timers & Retirees
• Summit
• Performance.

What we offer

- Seasonal blood screening to establish baselines and catch brewing issues early (performance or senior wellness profile; PPID check for older horses).
- Joint support plans to maintain comfort and mobility through training blocks and age change (4Cyte® daily oral support or Arthropen® injection courses under vet guidance).
- Simple, stepwise recommendations that pair with hoof balance, nutrition and workload management.

HVS

EXPERT VETERINARY CARE. ON THE MOVE.

Packages at a glance

Base – Dentistry, FEC + plan, core vaccines + hoof X-rays.

Old Timers & Retirees – Base plus Geriatric Profile + ACTH.

Elevation – Base plus Hendra + Gastroscopic Exam.

Summit – Elevation plus EHV and Performance Profile.

Performance – Elevation plus EHV, extended Performance Profile (with SAA) and 4Cyte®/Arthropen®.

Guardian – Elevation plus after-hours call-out.

Program Benefits & After-Hours Access

Join an Annual Package and you'll receive:

- A scheduled, proactive care plan mapped to your horse's needs.
- **Eligible package clients** get our after-hours phone line.
- Consolidated visit days to reduce call-out costs.
- Clear savings compared with RRP.

Peace of mind: a vet who knows your horse, a call away at night or on weekends.

HVS Base Package

HVS
EXPERT VETERINARY CARE. ON THE MOVE.

Inclusions:

- Premium Dental Service
- Fecal Egg Count (FEC) with Annual Worming Plan
- Tetanus and Strangles Vaccination
- Yearly Hoof X-rays with Customised Farrier Report

Package Price $949/yr

RRP $1136 (Save $187)

All services conducted in single visitation on farm, travel fees apply.

Gastroscope days are held regularly, generally every two to three months, and have separate terms and conditions

HVS

EXPERT VETERINARY CARE. ON THE MOVE.

Package Price $1049/yr

HVS Old Timers and Retirees Package

Inclusions:

- Premium Dental Service
- Fecal Egg Count (FEC) with Annual Worming Plan
- Tetanus and Strangles Vaccination
- Equine Geriatric Blood Profile with Cushings (PPID) Testing
- Yearly Hoof X-rays with Customised Farrier Report

RRP $1668 (Save $619)

All services conducted in single visitation on farm, travel fees apply.
Gastroscope days are held regularly, generally every two to three months, and have separate terms and conditions

HVS Elevation Package

Inclusions:

- Premium Dental Service
- Fecal Egg Count (FEC) with Annual Worming Plan
- Tetanus and Strangles Vaccination
- Hendra Vaccination
- Yearly Hoof X-rays with Customised Farrier Report
- Gastroscopic Examination

HVS

EXPERT VETERINARY CARE. ON THE MOVE.

Package Price $1199/yr

RRP $1534 (Save $335)

All services conducted in single visitation on farm, travel fees apply.

Gastroscope days are held regularly, generally every two to three months, and have separate terms and conditions

HVS

EXPERT VETERINARY CARE. ON THE MOVE.

Package Price $1549/yr

RRP $1888 (Save $339)

All services conducted in single visitation on farm, travel fees apply.
Gastroscope days are held regularly, generally every two to three months, with separate terms and conditions

HVS Summit Package Inclusions:

- Premium Dental Service
- Fecal Egg Count (FEC) with Annual Worming Plan
- Tetanus and Strangles Vaccination
- Hendra Vaccination
- Herpes Vaccination
- Equine Performance Blood Profile
- Yearly Hoof X-rays with Customised Farrier Report
- Gastroscopic Examination

HVS Performance Package

Inclusions:

- Premium Dental Service
- Fecal Egg Count (FEC) with Annual Worming Plan
- Tetanus and Strangles Vaccination
- Hendra Vaccination
- Herpes Vaccination
- Yearly Hoof X-rays with Customised Farrier Report
- Gastroscopic Examination
- Equine Performance Blood Profile (with inflammatory biomarkers)
- 4Cyte 1L Gel or Arthropen 50ml Bottle

HVS

EXPERT VETERINARY CARE. ON THE MOVE.

Package Price

$1899/yr

RRP $2504 (Save $605)

All services conducted in single visitation on farm, travel fees apply.
